Likely Beyond June 2019

CLEAN AIR AND SUSTAINABILITY DIVISION

Hot Issues:

Limetree Bay Terminal and Limetree Bay Refining: The remaining issue regarding the methodology to use to estimate the short-term emission rate for the EJ analysis was resolved on 4/18/2019. OAQPS agreed with Region 2 that the method proposed by LBT for determining a short-term emission rate for the dispersion model was a reasonable approximation. The LBT consultant was given the green light to proceed with the remainder of the EJ modeling protocol. They should be able to submit the protocol within the next two weeks.
